California’s energy efficiency industry is thriving. Let’s keep it that way.

Nearly 319,000 people work in California’s growing energy-efficiency sector. Energy efficiency jobs:
- are woven throughout California’s economy, from manufacturing to professional services to engineering
- include a range of professions; eighty-four are shown here

From design and construction to weatherization work, California’s energy efficiency workforce matters.

Energy efficiency improves quality of life. It:
- creates jobs
- grows the economy
- saves Californians money on their energy bills, helping balance family budgets

Please support policies and programs that will help keep California’s energy efficiency workforce strong.
