

SUPPORT YOUR LOCAL ENERGY EFFICIENCY INDUSTRY

[I am a] program manager for Energize Delaware.

Suzanne Sebastian, Delaware Sustainable Energy Utility, Magnolia, DE

Energy efficiency: America's Job-creation powerhouse 

Delaware's energy efficiency industry creates good jobs, lowers bills, and strengthens the economy.

As of October 2020, 10,926 people work in Delaware's energy-efficiency sector.

Delaware's energy efficiency workforce is historically a job-creation powerhouse. This sector was hit hard by the COVID-19 pandemic. Support for energy efficiency will create jobs and save Delawareans money on energy bills helping balance family budgets during difficult times.

Energy efficiency is key to economic recovery. Please support policies and programs that will enable Delaware's energy efficiency sector to create jobs and provide benefits for communities.

I am the program coordinator for a heating repair replacement program.

Bethel Moya, First State Community Action Agency, Millsboro, DE

Energy efficiency: America's Job-creation powerhouse 

Faces of EE is an educational initiative led by E4TheFuture, a nonprofit organization dedicated to bringing clean energy home for all Americans.
