Energy efficiency: America's Job-creation powerhouse 

Nevada's energy efficiency industry creates good jobs, lowers bills, and strengthens the economy.

As of October 2020, 10,490 people work in Nevada's energy-efficiency sector.

Nevada's energy efficiency workforce is historically a job-creation powerhouse. This sector was hit hard by the COVID-19 pandemic. Support for energy efficiency will create jobs and save Nevadans money on energy bills helping balance family budgets during difficult times.

Energy efficiency is key to economic recovery. Please support policies and programs that will enable Nevada's energy efficiency sector to create jobs and provide benefits for communities.

Faces of EE is an educational initiative led by E4TheFuture, a nonprofit organization dedicated to bringing clean energy home for all Americans.
